Activity Report	3
Detailed Statistic	4

Having twins is a pretty big deal. Having twins who are born 4 months premature cannot be described? said Ahd, the mother

Galeb and Batoul were born at 25 weeks gestational age, both were about 1.8 pounds, spent 104 days at the NICU where they faced a long and challenging journey.

“Reaching their first birthday really was a miracle, Yacoub, the father, said, but reaching their 3d birthday in good health is more than miracle, we are really blessed. For this we decided to share our happiness with the fantastic health care team in the NICU who were there to advocate for our children. “You feel like they made a huge impact on your life,” Yacoub says of the NICU staff. “You feel like there’s no way to pay them back.

“Our Children are celebrating their 3rd birthday today and we are as parents so proud of our little toddlers, they have overcome so much and still every little thing they do everyday melts our heart.

Bazazo*

When you have a premature baby, it's common to go through powerful and mixed feelings – happiness, confusion, fear, worry, helplessness and more. It's hard when you don't know what the future will bring. Tears welled in the staff's doctors and nurses while celebrating the small toddlers' birthday, singing and playing with them.

This is the victory when you see the fruits of your hard work, Thank GOD who always help and guide us. They are such countless joyful moments
